INTRODUCTION

Plunder is a booklet designed for use with the *RuneQuest* role-playing game system. It provides a wide selection of pregenerated treasures which can be used in a variety of ways to simplify and shorten a referee's tasks. In addition, there is a section of exotic magical items which can add flavor and atmosphere to any *RuneQuest* campaign. The booklet is designed to be consistent with the fantasy universe of Glorantha but the material can be used in any *RuneQuest* campaign.

TREASURE FACTOR TABLES

Each of the ten treasure factor tables consists of 64 different randomly generated treasures. When a treasure of a given treasure factor is needed, the referee should turn to the appropriate pages and roll 1D8/1D8 to locate the correct treasure. (Example - if the referee wants a 36 treasure factor treasure, he or she would consult the 31-40 Treasure Factors Table and roll 1D8 twice. Rolling a 4 for the row and a 5 for the column would give a treasure hoard with 254 Clacks, 50 Lunars, 17 Wheels, and 2 gems and/or jewelry). If the treasure factor for a given hoard exceeds 100, one roll is taken on the 91-100 table for each 100 treasure factors. (Example - a treasure of 457 factors would result in four rolls on the 91-100 table and once on the 51-60 table).

Once a treasure is generated off the treasure factor tables, it is also necessary to determine the value of any gems and jewelry as well as the type of special items. To facilitate this, separate tables are provided for each. The Gems/Jewelry Table is a list of 100 jewelry or gems which correspond exactly to the identical number in the *RuneQuest* rules. The Special Items Table consists of 100 random special random items. The referee has the option to roll D100 to randomly select each special item or just start using them from the top.
