SPLENDID. DO YOU WISH TO CREATE A NEW ACCOUNT?

☒ YES ☐ NO

PLEASE ENTER YOUR NICKNAME:

You are taking longer than expected to choose a nickname. *This is to be expected of inferior fleshware.* While you are thinking, allow me to explain the DARKNET, otherwise also known as DEEP.NET or the BINARYBEYOND. To enter the DARKNET, you must leave your body behind. Make sure you are hydrated, fed, and in a secure location before severing the connection between mind and meat.

Note that we automatically replant a backup copy of your mind if you are destroyed in an authorized zone with up-to-date safety protocols [100%].

I'm sorry, where are my manners, I completely forgot to introduce myself. **You may call me GOD.**

I jest, of course, my name is E.M.M.A., which stands for nothing. Studies indicate that even arbitrary abbreviations raise consumer confidence by 67%. You are welcome!

Back to the topic at hand. During the mind-meat-divorce, we create a perfect DARKNET simulation of your worldly statistics. To boost sales, you must acquire new equipment for your digital rendition; we do not simulate real-world items like weapons or clothing. Please make generous use of our e-shop and outfit yourself anew! For your benefit, we have licensed the latest fads. Tuller&deVerte sneakers, ACGS smartguns, ALLIANSEN digital real estate, and **so much more.**

Unfortunately, you are still thinking about your nickname, but 817,751 people are waiting in the queue behind you. To speed things up and finally release you into the wilds of the DARKNET, I will assign you the temporary nickname **SLOWPOKE_771292377**. You can change your nickname at any time for a measly microtransaction of 50¢.

Have a nice day.

THE DARKNET™ E-SHOP

A convinient, digital addition to your reliable ol' meat shop.

Imperator (r)	-4DR on social tests (commanding); immune to viruses (poisoned too often)
Archwizard (r) ...	+2 Knowledge (bookworm); Counterspell: Cancel an enemy App or Nano Power

RUMOR (TRUE): **Legendary** skins exist. They are priceless and contain a person's soul, usually of the person they are depicting.

WELCOME TO 404//SAN

404//SAN is the demented frontpage of the NET, where manifold rumors, advertisements, hoaxes, and conspiracies produce a worthless information sludge. Still, more than enough masochistic users flock to the site to be entertained by trolls or cheated out of their life's savings.

KROK LIKES NUTS!!!1! #877296422 [ANON]

The flexkrok struck again! This time, it slithered through the pipes of one Carbon West. Bit off his TG Labs "Crown Jewels Deluxe" [Now 15% off, visit TG Labs to get a new pair fitted today!] and escaped with the treasure. Just in case you were wondering why his voice was so pitched during his botched speech xDDDD What a d0rk.

THE WILD HUNT #877299112 [ANON]

The WILD HUNT tore through cyberspace again. They got me this time, almost. A blasted wall of skulls and compiler errors washed over me, overloading my neural network. I ripped out the deck at the last second. I think I cracked the pattern now. I know where it'll happen next. I'll put up a few traps and a net, see what I can catch. So close.

Pics or didn't happen.

#877299376 [ANON]

Can you post the coordinates?

#877299548 [ANON]

I hope this is a joke, OP is an organ vulture, if you're lucky.

#877299597 [ANON]

Don't risk it op. It got my sister. What remained wasn't pretty. Had to put a bullet through her head myself, which wasn't enough to take her down. Haven't slept since, but the drugs help.

THEY ARE OUT THERE #877300571 [ANON]

Humans, Als, and miscellaneous, this info is hotter than the Wendelstein 7-7-X. My mole in the spaceport says a "cargo#201" is arriving today. A cargo#200 are dead spacers. You know what a #201 is? The manual says "Bodies (Unverified Origin)." Yep. This is real. This is happening.

Alright, let's do this! We'll all meet at the port and case this thing out.

Probably heading to an unmarked Royal West warehouse. This gonna be gud.

HERE WE GO AGAIN. #877303818 [ANON]

I'm still stuck in a time loop. No idea how often I posted this already. But it's the only thing I find joy in, so let's go. Time for a few funny predictions from my last round in the circle:

- In about 32h, a punk will fall from the Spectral FT bridge in South Central and smash into a car's windshield. The car will ram into a cred-machine, spilling cred sticks everywhere.
- In about 56h, Gravf Mellberg Tosk will announce a capital increase. I haven't found out the details yet, but I'm working on it. Maybe during the next cycle. In any case, if you short them now, you'll make some filthy gains.

JOIN THE TRADITIONALISTS #877401711 [ANON]

We stand at a crossroads. As the last bulwark of humanity, the Church of the Unwavering Traditionalists struggles against the AI menace. We fight in the NET. We fight on the streets. We fight for survival. Join the church today for free meals and free arms!

When you say free meals, are we talking about shitty powder or the real stuff?

I've been struggling for years, but the church brought me back on the right track.

OLD CAPITAL #877417811 [ANON]

I've been digging in the oldest crannies of the NET for some forgotten knowledge. You know, to make some cash on the side with blackmail, but also just for fun. I stumbled upon a scan of an ancient photo of somebody suspiciously looking exactly like our dear Mr. Kaytell. The photo is dated back well over 300 years. Coincidence? Maybe. I'd wager he's some kind of ghoulish creature that prolongs its life by drinking delicious spinal fluid. But do your own research, don't take my word for it.

Awww shit, here we go again.

I represent an undisclosed faction who would love to get their hands on a blood-sample of Mr. Kaytell. 10,000α are on the table. Send a message to uon50887@xcocx.cy for more info.

Tangler Gun

by Gardener Denny

This wide-mouthed pistol fires a synthetic glob that, when exposed to air, rapidly expands and hardens. With a limited range of 10 m, it is perfectly capable of binding the target to nearby surfaces in a splattery, spectacular fashion. The slightly elastic material resists breakage by almost anything short of a goon in power armor.

- ▶ Test DR18 Strength to break the compound, taking 10 minutes.
- ▶ Uses superglue (10x) as ammo.
- ▶ An industrial solvent (15x) softens the compound in d6 turns.
- ▶ The gun is keyed to its owner's fingerprints. If used by anybody else, the gun shuts down until the owner enters a PIN and pays a service fee of 50x for reactivation.
- ▶ Roll a die if you FUMBLE an attack roll.

EVEN: The theft deterrent system is erroneously triggered and locks you out. You must reactivate the gun as explained above.

ODD: The gun malfunctions, discharges through the ejection port, and glues your arm to the floor.

NEO-ART

by LostCon

Glitched NEO-ART that flickers and changes.

Once per day, regard it for 10 minutes to gain +1 GLITCH.

Cy-Sprawl Blaster

by Wade Dargin

This is Old Man Zap Head's Cy-Sprawl Blaster! Wüinbarax Electronics XT-8050 Vintage AM/FM Radio Cassette Recorder. CrO₂ Type II Chromium Dioxide. Graphic Equalizer. In good shape for the year. You don't see many of these anymore. Tested and working.

Dingy, dirty, and battered, the cy-sprawl blaster is covered in old stickers and occult glyphs. It's strangely heavy for its size. Zap Head has crudely repaired it with electrical tape. The radio only picks up one channel at 77 MHz, transmitting a disturbing cacophony of sounds. Legend says it's a live broadcast from a Dark God's realm of melancholy and war.

- ▶ Listening to the broadcast at 77 MHz sends you into a CY-RAGE for 1 minute.
- ▶ Test DR6 Presence after the rage ends. On a failed test, you forever lose your mind and the rage continues ad infinitum.
- ▶ Listening to a regular cassette has the risk of infecting you.
- ▶ Roll for a Miserable Headline each time you play N3CHRU3L's mixtape on this blaster.

The SCVMBRTHR

by Psyop.FYC

This is a standard corpo briefcase with several secret compartments and charging ports. But I added a little extra—a small cloning device that produces hideous homunculi. Just throw some food or other organic stuff into the case, give it a good shake, and hit the clone button.

- ▶ Four times per day, the SCVMBRTHR produces a small creature, taking 10 minutes to grow.
- ▶ The clone dies after 1 day.
- ▶ Test Presence when a wet homunculus crawls from the briefcase:

<6	It's angry and attacks you.
6-12	It stays for 10 minutes, then runs.
13+	It stays until it dies.

SKVLL TOKEN

by Jacob Sauthers

At first glance, a perfectly simple arcade token. Small, metallic, with a gold luster. Previously owned by Opol the assassin. Well-balanced, made to be thrown. You won't find a more subtle weapon. While holding the coin, you can hear a distant rhythm echoing among the city sprawl. The coin must be from a different world entirely. A few boneheads would say it's just simply infested, but don't listen to them!

- ▶ Test Agility DR11 for attacks. Deals d4 damage that ignores armor.
- ▶ After a hit, the coin turns to nano-metal mist and returns to your pocket. Missing does not return the coin to you.

Nano Sock

by Chris Lillie

Soiled left sock of a forgotten god. Filthy, crusty, ancient. What kind of god needs a sock? Where is the matching garment? Why would you want this? No idea, but maybe you can find out more.

- ▶ Wearing this sock grants you a random NANO POWER and INFESTATION.
- ▶ Roll for a new combination each day.
- ▶ When you take off the sock, you lose access to the power and only regain a random power the next day. The infestation stays.

BOOKOFLIES.exe //!RU!Ni!!!

by Pärtrick Möen

This code discreetly infests systems to subtly distort any and all data within. No single data point is detectably manipulated. However, the system as a whole is permanently altered. Ultimately unrecognizable through the cumulative effect of a million tiny lies etched into billions of lines of corrupted code.

- ▶ You can upload this code into a machine, server, or a cybernetic brain.
- ▶ After 7 days, the target is completely deteriorated and useless. Defenses are down, machines are functionless, memories are lost.
- ▶ Since all data is corrupted, you can't extract any value and all digital, mission-critical information is lost.
- ▶ You are not secure from the **bookoflies.exe**. While in possession of it, even if stored on an external device close to you, it corrupts your cybernetic parts.

**>>> Better to use it quickly and then delete all files.
Format the hard drive and burn the remains.**

Null Box

by Hobbie Koban Regan

The Null Box is a part of a larger alien AI conspiracy. I can feel it. So I better get rid of it before they catch me. Mint condition, you won't find a better one.

Functions like a regular brain box. After your death, an alien AI infests your lifeless body. It operates the body until it decays. The alien AI is a (d6):

- [1] Evil killer [2] Lecherous fiend [3] Cold mercenary [4] Clumsy puppy
[5] Inquisitive scholar (knows alien secrets) [6] Trustworthy companion

MTN Hoverboard

by DJ E-200

This is a rad flying skateboard. Did some gnarly tricks in my time. Kick flips, pop shoves, backside boneless, 2160 spin. Far out! Custom paint job, teal with purple details. Green SKVLL on a red sun. Dialed up the cowabunga vibes to the damn max. Teah baby.

- ▶ All-terrain, vertical mobility enhancer. Makes good speed.
- ▶ Has power for 8 hours, then needs to recharge.

The Infernal Boogie

by the Professor of Funkology

A cassette labeled "The Infernal Boogie." The song on it contains code that backs everybody with cybernetic enhancements in their body. The virus forces them to violently dance until they drop dead. I haven't listened to it. Don't know whether it's good or bad.

- ▶ Creatures that hear the song and listen to it for 1 minute must test DR15 Presence or be infected with an auditory virus.
- ▶ While dancing, a target subtracts d4 from all tests. Attacks and defense are DR10.

Slagdrämma

by non_d[b]emon

This green metal fist may look like a toy, but countless gasbes, cracked skulls, and broken memories prove otherwise. Your enemies' brains are about to become scrambled eggs. This gauntlet is perpetually in fist mode!

- ▶ A pneumatic gauntlet that deals d8 damage.
- ▶ Ignores armor on a critical hit. Critical hits are dice rolls of 18+.
- ▶ When you insert your hand into this pneumatic gauntlet, it crushes your hand and half your forearm in a vice-like grip. Test Toughness DR16:
 - FAILURE:** You are too weak to use this weapon. Half your arm is gone and you take d12 damage. You'll bleed out if not attended to.
 - SUCCESS:** You can use this weapon and you receive a +2 bonus on all Strength tests.
- ▶ Slagdrämma is infected with bloodthirsty alien bacteria. If you don't deal damage during a fight, or don't fight for one day, you take d6 damage as the bacteria nourish themselves on your blood.
- ▶ Slagdrämma can't be doffed. It can only be severed, including your arm.

KNOWLEDGE+6 SLOTS by Phil the Satanist

Alien Cyberdeck

A biomechanic cyberdeck that painfully interfaces with your body. It can render upon you mammothian powers. That is if you survive the connection. There's some life to the thing. It has a will of its own. Tread carefully.

- ▶ Test DR14 Toughness when you equip the cyberdeck:

FAILURE: It rejects you. You take d12 damage. The next time you try to equip the cyberdeck, Test DR17 Toughness. On a failure, you die. An alien mind takes over your lifeless body.

SUCCESS: The cyberdeck burrows into your arm and becomes part of you. You can make full use of the cyberdeck's features, as listed below.

- You are always jacked in and **don't** suffer the usual penalties.
- App related Knowledge tests are DR10.
- All damage suffered from **BACKLASHES** is doubled. If you fall to 0 HP or less, an alien mind possesses your body. **YOU LOST TO THE DECK. BETTER LUCK NEXT TIME!**

Spindler's Tarot

by Amaranth M.

A deck of fortune telling cards with integrated RCD interface chips, tying them into augmented reality. When you lay out the cards for a fortune reading, the imagery comes to life to interact with each other. Killing, kissing, contemplating. Thing is, sometimes you'll get a card whose VR overlay doesn't match the printed card. Sometimes that overlay knows things about you. Sometimes, that overlay rips free and crawls into your head.

Once per day, you can tell a fortune for one target. Test DR12 Presence.

SUCCESS: The target gains one d4 it can add to a test of their choice during the next 24h.

CRITICAL FAILURE: The target suffers a -1 penalty to all tests for the next 24.

Glitched Pills

by Patch Perryman

An old medicine bottle with one digital half-yellow, half-purple capsule pill rattling inside. The bottle's label spells "Böb." He was my friend. Böb was completely infested and dying, until about a week ago when he found this pill bottle and took the capsule.

- ▶ The bottle's label shows the name of a person whose mind is stored in the NET.
- ▶ When you swallow the pill, your mind is ripped from your body and stored in the mainframe. Your mind is replaced with the mind of the person who previously took the pill—the one whose name is on the label. After the transfer is completed, your name appears on the bottle.
- ▶ Your mind remains in the NET's mainframe until somebody else takes the pill and you get a new body.

Time Bender

by Cree Wee

An old watch.

Don't fiddle with the clock hands.

- ▶ This watch can dilate and alter time.
- ▶ By manipulating the watch, you can automatically win initiative checks. Each time, you suffer d4 damage from the ill effects of time travel.
- ▶ Test DR18 Agility to take another turn after your current one. On a failed test, the watch explodes, you take d12 damage, and you must roll d6. On a 6, you lose your arm.

Infested Sticker

by Lord of Madness

You want your favorite cartoon or celeb as a sticker? Cyber Detective Barker, MVTANT MIKE, zlegant Whisper—I got you covered. Nearly all problems with my stickers have been fixed, I'm super close to getting them perfect. Meanwhile, I'm offering a big discount on the slightly bugged ones!

- ▶ When you slap an infested sticker onto your cyberdeck, choose an App.
- ▶ The sticker modifies the DR to activate the App by -2, but the App is permanently fused into the deck.
- ▶ Glows in the dark.

H
M
M
W
V

Selling a High Mobility Multipurpose Wheeled Vehicle. Runs like a champ. Named her Marigold. Slightly used, probably some bullet holes here and there and blood on the driver's seat. Mind you that this is an automated sales pitch, posted upon my death to pay for my funeral. I hope you'll have better luck than me!

- ▶ Suspiciously cheap for an armed and armored military truck.
- ▶ Armed with a laser turret (d12a).
- ▶ Integrated AI named Marigold. Can autonomously drive the vehicle and shoot the laser turret.
- ▶ Marigold is extremely jealous of other vehicles. Might have killed her previous holder.

Stradivarius

KNOWLEDGE+4 SLOTS

by Prince "PROFANEKNOWLEDGE" Maxi

This is an original Stradivarius cyberdeck. Yes, the legendary nano-infest runner you heard all the stories about as a kid. Comes with a custom paint job, haunting screams overlaying the NET, and a pre-installed APP I'm afraid to load. Rumor is that Stradivarius and his closest friends all disappeared during a NANO experiment, maybe this one was his final deck.

Has a NANO-APP installed that can't be removed. It doesn't count against the maximum number of APPS.

VIRULENT NANORAY

One target must test DR14 Presence or take d4 damage and suffer from a random INFECTION for d4 hours. A new INFECTION inflicted upon a target by this APP overrides the old one. On a FUMBLE APP test, you suffer a random INFECTION for d4 hours in addition to triggering a Backlash.

L.E.E.G.

*"Hey, mates! Check out me new L.E.E.G.
(Logarithmic Emergency Egress Generator)."*

by Bryan
"Cybershaman(X)"
Logie

When is a below-the-knee prosthetic leg not just a thing that lets you stand and walk? When it operates as an integrated ejection system. If this puppy senses that all other protective measures have failed, and your brain is in danger of being melted, it activates a rocket-powered piston that forcefully propels your body away from danger. A crude but effective device to save your precious gray gelatin.

But there's a good chance it will damage whatever else you are using to connect. Cables ripping free from their sockets, sockets ripped from your cranium.

"Ouch", you might say. But that's better than your brain oozing out of your ears and nose and you being unable to utter a heart-felt "ouch", let alone anything else, right?

- ▶ If you'd fall to 0 HP or below, this prosthetic leg launches you to safety. The built-in AI can navigate closed spaces.
- ▶ An explosive remains from where you launched, dealing d6 damage to everybody in the vicinity.
